

École Supérieure d'Electricité - Supélec

Gif sur Yvette (Paris)

PROFILE

Since its founding in 1894 to meet the needs of France's emerging electric industry, Supélec has trained nearly 25,000 French and foreign engineers. Located on three campuses at Gif sur Yvette, Metz and Rennes, Supélec has become the *Grande École* for engineers in the fields of **information sciences and energy**. With a faculty of 140 permanent academic staff, more than 400 part-time associates and 90 researchers with the Centre national de la recherche scientifique (CNRS), the school trains each year more than 2 000 students 250 of which are 170 doctoral candidates, and 1,300 interns in continuing education. Supélec awards annually 460 Engineering degrees, 80 master's degrees and 50 doctorates.

Major fields of study

Engineering training at Supélec focuses on three major areas: knowledge of corporate culture, vast scientific and technical culture, knowledge and specialized skills developed in one of the school's major disciplines. The curriculum seeks above all a balance for students, who eventually, will assume diversified responsibilities within a corporate setting. **The academic disciplines center on information technology and energy, specifically, computer sciences, telecommunications, digital processing and electronics, electrical engineering and automatic control engineering.**

Research

Supélec has the potential for 465 researchers to do work that is divided between the school's teams and those associated with the CNRS. The driving force behind this research is industrial innovation, which draws on the institution's academic strengths. Every year Supélec produces some 725 major publications, 17 patents and 50 successful theses.

Strengths

Each of Supélec's campuses can house all of its students and offers a wide range of facilities and services, including a central library, language labs, free access to computer centers and computer connections in dorm rooms, sports facilities and university restaurants. Numerous student activities and associations also are available.

Photograph provided by the institution

Supélec has had a long-standing international dimension: 40 percent of its engineers earn a double degree (engineering degree or master) and nearly 25 percent do an internship abroad. **Supélec recently established an international research laboratory with the University of Singapore.** The school is also developing Ph.D. programs with several foreign institutions.

Location

Supélec is part of a network. The school awards a single diplôme but it can be earned on three different campuses, Metz, Rennes, or in the Paris area at Gif-sur-Yvette, where Supélec's headquarters is located. All three locations offer a rich scientific university life.

IDENTITY FORM

Precise name of the institution →	École Supérieure d'Électricité
Type of institution →	Private
City where the main campus is located →	Gif sur Yvette (91)
Number of students →	2,000 students 250 of which are doctoral candidates
Percentage or number of international students →	Nearly 20% foreign students
Type and level of qualifications awarded →	• Engineering degree • Master's degree • Doctorate
French language courses →	Yes
Programs for international students →	No
Programs in English →	Yes
Registration fees / year (for information only) →	920 euros per year for the engineering degree, 231 euros for the master's degree, and 350 euros per year for the doctorate.
Postal address →	Plateau de Moulon, 3 rue Joliot-Curie, F 91192 Gif sur Yvette cedex
