

SUPINFO

The International Institute of Information Technology

● Institution's profile

Founded in 1965 and State accredited since 1972, SUPINFO, The International Institute of Information Technology, is one of the rare higher-education schools where the study of information systems is at the core of a 5 year long training programme. With its worldwide network of schools, SUPINFO grants a European Master of Science in Computer Science which is accredited by the French State at Level I (Bac+5, Engineer, Master) and recognized by the European Accreditation Board of Higher Education Schools (EABHES).

Today, with more than 4500 alumni, SUPINFO has managed to preserve its top-ranking position through the quality of its programmes, which combine high technology and management courses. Educational partnerships with the world computer industry leaders (Microsoft, Oracle, Cisco, Mandriva Linux, IBM, Apple, Sun, etc...) allow students to be trained in state-of-the-art technologies and to prepare for widely sought after professional certifications.

SUPINFO students must carry-out internships at the end of each of their five year long training: each year, these internships last 3 months from the first to the fourth year and 6 months in the last year of their studies amounting to 2 years professional experience upon graduation.

Now present all over the world through its network of schools, SUPINFO offers unique opportunities for international experience and interaction on all continents: SUPINFO is composed of more than 20 schools in France (including 2 schools in French overseas departments), 1 school in Canada, 1 school in the UK and 4 schools in China. Each SUPINFO student can take advantage of the mobility offered by the school. Each school year can take place in any one of the schools of the SUPINFO network.

Major fields of study

European Master of Science in Computer Science

SUPINFO is specialized in computer science and provides an extensive knowledge in software engineering, systems and networks, arti-

Photograph provided by the institution

ficial intelligence, data analysis, Internet and Intranet technologies, business intelligence, ERP, multi-media and so on ... Moreover, together with the Information Technology courses, general knowledge subjects such as International and local law, management, communication techniques, international management, quality-control management among others make up the full curriculum which ensures that our students become the fully mobile and versatile professionals sought after by businesses all over the world.

Research

SUPINFO is strongly supported by the IT Industry world leaders. It has created, in partnership with these major companies, the first education laboratories which have become a reference not only in the field of education but also for businesses using advanced technologies worldwide. Thus, SUPINFO students can participate, with the direct assistance of the IT industry leaders, in the study and development of the most widespread and up-to-date technologies.
